

**UB Electricals**

SPECIALIST IN  
ELECTRICAL WIRING, CHIMNEY & FABRICATION WORKS ETC.

# About UB Electricals

## Powering Industries, Empowering People

At UB Electricals, we are more than just an electrical contracting company—we are a trusted power partner dedicated to building reliable infrastructure that drives growth and innovation. For over a decade, we have combined engineering expertise, cutting-edge technology, and a customer-first mindset to deliver electrical solutions that meet the dynamic needs of industries and businesses across India.

As a certified "A-Class Electrical Contractor," we specialize in providing end-to-end services for high-voltage and low-voltage projects. From planning and design to installation, testing, commissioning, and maintenance, our goal is to create safe, efficient, and sustainable electrical networks. Every project we undertake is guided by a commitment to quality, safety, and timely execution, ensuring that our clients experience seamless power delivery without compromise.

What sets UB Electricals apart is our ability to handle complex, large-scale projects while maintaining the same personal attention and dedication we bring to smaller assignments. Whether it's an industrial plant, a commercial complex, or a critical infrastructure project, we deliver turnkey solutions tailored to the unique demands of each client.

We believe that power drives progress, and by delivering reliable electrical systems, we help our clients focus on what they do best—running their businesses and shaping the future.

## Our Journey - From Vision to Voltage

The story of UB Electricals began over 11 years ago with a simple but powerful mission: to provide safe and dependable electrical services that support India's rapidly growing industrial and infrastructure sectors. Founded by a team of passionate engineers and entrepreneurs, our company started as a small, determined group working on local projects, often overcoming resource constraints through sheer determination and technical know-how.

Through hard work, consistent quality, and an unwavering commitment to safety, UB Electricals quickly earned the trust of clients across sectors. Early projects focused on internal wiring and small-scale cabling assignments, but our reputation for delivering on-time and on-budget solutions opened doors to larger and more complex contracts.

Today, we proudly stand as a recognized industry leader in electrical contracting, with over 100 successful projects across India and a client base that includes some of the country's leading industries and infrastructure developers. Our portfolio spans high-voltage substations, advanced lighting systems, heavy industrial cabling, transformer installations, and specialized plant electrical works in sectors such as power, manufacturing, construction, and commercial development.

Despite our growth, we remain deeply connected to our roots. The same principles that guided our first project—integrity, quality, and customer satisfaction—continue to shape every decision we make. Each milestone is a testament to our team's dedication and our clients' trust, motivating us to keep innovating and expanding our capabilities.

Looking ahead, UB Electricals is focused on embracing emerging technologies, from energy-efficient systems to smart automation, to meet the evolving demands of modern infrastructure. Our journey is far from over; in fact, we believe it has only just begun. With every project, we move closer to our vision of becoming a nationwide leader in sustainable electrical solutions, powering the growth of industries and communities alike.

Our vision is to be a trusted leader in delivering innovative, safe, and future-ready electrical solutions that empower industries, strengthen infrastructure, and contribute to a sustainable, energy-efficient India.

## Our Vision

## Our Mission

We are guided by values that define every project we undertake - excellence in every connection, uncompromising safety, continuous innovation and adaptability, integrity and accountability, and a customer-centric approach that ensures lasting trust and measurable value.

Our mission is to provide end-to-end electrical contracting services with unmatched quality and precision, integrating advanced technologies, maintaining strict safety standards, and building long-term partnerships through transparency, professionalism, and timely execution.
